Announcement

August 10, 1909.

The successful growth of our publishing business is being given expression in a large plant now in course of construction in the center of the business section of Cooperstown, New York. The plant will be ready for occupancy in late autumn and will provide room and facilities for handling the increasing business with which we have been favored.

For the past fifteen years we have been building broad foundations for this business and now, with a large, carefully designed and specially equipped plant, we will be ready to give our customers the best of work and service in all departments.

The new plant is to be an absolutely fire-proof structure from basement to roof, even the window frames and casings are of metal. The dimensions of the building are 57 by 142 feet, four stories and basement. The entire building is to be used by our publishing and printing plant. It is so situated that there will be perfect light on all sides with no chance that a building by any other company can be erected within fifty feet. Our property has space remaining which is to be reserved for the erection of a companion building in the future, and the present structure has been designed with that in view.

It gives us pleasure to make this announcement, regarding the new plant, to our friends of Cornell.

THE ARTHUR H. CRIST CO.

ARTHUR H. CRIST, '90, President

ERLE W. WHITFIELD, '95

New York Representative
